TRAVEL ADVISORY / PRESS RELEASE
April 25, 2018

Phase II Detour for Castle Creek Bridge / Hallam Street Improvement Project Begins April 30
New traffic pattern begins April 30, 2018

Aspen, CO – Modified phase II detours for the Castle Creek Bridge / Hallam Street Improvement Project will begin at approximately 7 a.m. on Monday, April 30. This is a change in the schedule; originally this shift was set to occur May 7. Mondays-Fridays and most Saturdays, from approximately 7 a.m. to 7 p.m. outbound motorists will use the Power Plant detour. Significant traffic delays are anticipated during peak travel times for both inbound and outbound traffic. These detours will be in effect until June 12 when crews will stop work before resuming with Phase III on approximately August 13.

“Project crews are tracking well with their overall construction schedule. Modifying the schedule and routes enables crews to begin installation of permanent roadway instead of using of temporary asphalt,” said project manager, Hailey Guglielmo. “As we transition into phase II we want to remind motorists to use the official detour route as the west end will be configured to prioritize the detour. That will be the most efficient way out of town besides taking advantage of public transit or riding your bike. The best way to stay informed on project schedule and detours is to sign up to receive project updates.”

Updates on construction activities, schedule, detour routes and alternative transit will be shared via the project update email. To sign up, reach out to the project hotline or visit the project website, castlecreekbridge.com.
